# PRIMARY POWER LARGE RATE Time-Of-Use

# CHARACTER OF SERVICE

Service under this rate is available to commercial or industrial customers where the customer agrees to pay for service on the basis of 500 kW or more of demand, takes service at primary voltage and owns and maintains such transformers and other substation facilities as may be required to transform the available voltage to the voltage or voltages required by the customer.

An optional Coincident Peak rate for Transmission charges is available on an opt-in basis for separately metered Electric Vehicle Charging and/or Battery Storage devices known as the "DC Fast Charging and Storage Eco option".

Customers taking service under this rate schedule are responsible for paying both Distribution Service and Stranded Cost.
