

Work being done through the rest of the day today, December 20, 2023, is likely to restore power to the streets listed here by town and city. It is not a guarantee that power will be restored. More than one circuit may power a street and additional damage may need to be repaired to fully restore the listed locations. If a customer does not see their street on this list, they should expect to be without power until at least tomorrow, December 21.
